HAROLD E. MOORE, JR. 1917-1980

Harold E. Moore, Jr., Liberty Hyde Bailey Professor of Botany at Cornell University, and Editor of PRINCIPES since 1957, died suddenly on October 17 after a brief illness. For Hal, the editorship of PRINCIPES was a labor of love. Those who knew and loved him should know that while ill at home and in the hospital he prepared this issue and did all but the final checking of the page proof. He has also edited manuscripts for January and April. We will publish a tribute to Hal later. Friends may send remembrances to the Harold E. Moore, Jr. Memorial Fund, Cornell University.
