Palms in tropical and subtropical small holder agriculture and development
WORKSHOP

17 November 2006, Aarhus University, Denmark

This workshop will analyze the continuum from wild to domesticated palms, and the trade-offs made along that continuum in agricultural systems. We will look at the narrowing of focus from a palm being more multipurpose in the wild to being grown for a single product as a domesticated species. The workshop will include lectures, discussions and the building of a matrix for palm uses in tropical and subtropical small holder agriculture.

The workshop is open to all development workers, consultants, practitioners, scientists and others interested the integration of local plants into agricultural systems. Fee 100 Euros.

Confirmed speakers: **Dennis Johnson** (Ohio, USA), **Michel Ferry** (Elche, Spain), **Daniela Salvini** (Copenhagen, Denmark), **Terry Sunderland** (Bogor, Indonesia), **Andrew Henderson** (New York, USA), **John Dransfield** (Kew, UK), **Anja Byg** (Oxford, UK). Organized by: **Henrik Balslev & Anders Barfod**, Department of Biological Sciences, Aarhus University, Building 1540, Ny Munkegade, 8000 Aarhus C., Denmark. Further information and registration, write to: henrik.balslev@biology.au.dk

**TROPICAL PLANT
& SEED LOCATORS**

Adenium obesum - Desert Rose

Bismarckia nobilis - Bismarck Palm

Chambeyronia macrocarpa
Red Feather Palm

Hyophorbe lagenicaulis - Bottle Palm

Ravenea rivularis - Majesty Palm

Wodyetia bifurcata - Foxtail Palm

International Import-Export

S & S Flower Shippers, Inc. Cert. #11124000
